

BERNHARD

ROTAMASTER 4000

Now Easier and Faster Than Ever

With a unique clamp mechanism and fast aligning jig bars, blade mounting is easy and fast, delivering significant benefits in overall cycle time.

ROTAMASTER ensures both ends of a rotary blade are sharpened equally with the precision that only an automated machine can deliver. Blades have a superior edge and a consistent balance which delivers a better quality of cut, resulting in longer lasting blades and better looking grass.

- **Automated** – Indexed in-feed with adjustable “auto cut-off”
- **Easy-to-use** – Ergonomic height for ease of use
- **Safety** – Ergonomically designed for operator safety
- **Value** – Offers substantial whole-life cost savings
- **Self-contained** – Compact with integral storage
- **Effortless** – Smooth pneumatically operated automatic traverse to take out the hard work
- **Reliability** – Most reliable
