

ANGLEMASTER 1000

Speed. Fast cycle time and change over between blades

Easy-to-use. Let the machine work for you

Safety. Ergonomically designed for operator safety

Value. Offers substantial whole-life cost savings

Accuracy. Delivers a clean cut to microscopic tolerances

Reliability. Unsurpassed warranty

Self-Contained. Compact, small footprint

Designed specifically for mower service facilities with more restricted resources, who appreciate the considerable benefits of an in-house grinding facility.

The Anglemaster 1000, supplied with a support frame, will prove an invaluable tool in the workshop.

This dry grind, manual traverse machine is highly accurate and easy to operate. When Anglemaster 1000 is used in tandem with Express Dual 2000 reel grinder, these very affordable machines provide a complete in-house facility for the grinding of reel mowers at high speed and at minimum cost.
