

THE ANGLEMASTER 4500. ULTIMATE CONTROL AND ACCURACY.

NEW 7.5" touch-screen

NEW Grind motor

NEW RFID technology

NEW Blade mounting bar

The new Anglemaster 4500 is the latest sharpening solution from Bernhard and Company. It provides a fully customisable platform for your bedknife sharpening needs – giving you flexibility on how, what and the way you sharpen.

INTERFACE & OPERATION

A new control system adaptable to your preferred way of working:

- New responsive 7.5" screen providing grinding selection for precision, consistency with options of grinding methods
- RFID technology allows recall of previous setups and different users
- Wireless handset providing intuitive commands for quicker setup
- Automatic in-feed

SPEED & EFFICIENCY

The latest innovations provide more effective sharpening:

- New main grind motor offers variable speed, allows you to match the right stone for the right blade
- Direct drive – fast and precise mounting bar rotation accurate to 0.5°
- Redesigned blade mounting bar with tri-magnet design for quick and consistent setup
- Traverse system: Variable speed auto-traverse with smooth direction change

USER-FRIENDLY

- LED lighting for bright and clear visibility
- Scratch resistant viewing panel
- Remote service module for support and customer care
- Robust soft-closing storage drawers

DIMENSIONS & POWER

- Doors open: 2270mm x 1420mm x 2000mm 89.5" x 56" x 78.5"
- Weight: 430 kgs 948 lbs
- Power requirements: 220 –240 V AC, 50/60Hz via a 20 Amp breaker
